SUMMARY

I recently completed my B.Tech in Computer Science and have been building projects that combine practical problem-solving with modern technologies. For example, I created an AI-powered Recipe Preparation Agent using IBM Watsonx.ai that suggests meals based on available ingredients, and an e-commerce demo site built with React. These projects taught me how to design, code, and deliver solutions end-to-end, and also how to learn quickly when exploring new tools.

EDUCATION

B.Tech. in Computer Science and Engineering, Meghnad Saha Institute of Technology (GPA: 7.86/10) Sep '21 — Jul '25
kolkata, India

- Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Operating Systems, Computer Networks, Artificial Intelligence, Programming for Problem Solving, Data Mining, DataBase Management System, Analog and Digital Electronics, Image Processing

Higher Secondary in Science, Nimpith Ramkrishna Vidyabhavan (GPA: 91%) 2019 — 2020
Nimpith, India

- Completed in 2020 with **91%** marks under the West Bengal Council of Higher Secondary Education.

Secondary, Nimpith Ramkrishna Vidyabhavan (GPA: 81%) 2017 — 2018
Nimpith, India

- Completed with **81% marks** under the West Bengal Board of Secondary Education.

CERTIFICATIONS

Front-End Web Development Certificate, IBM

Database Programming with SQL, Oracle Academy

Front-End Web Development Certificates, Google and Microsoft

Problem-Solving Using Computational Thinking, University of Michigan

ACHIEVEMENTS

[Achiever in Number Theory](#)

Earned the "Achiever in Number Theory" badge on Coding Ninjas, demonstrating skills in solving number theory problems.

[Specialist in Matrices](#)

Earned the "Specialist in Matrices" badge, highlighting expertise in matrix operations and related problem-solving skills.

[Achiever in Strings](#)

Earned the "Achiever in Strings" badge on Coding Ninjas, highlighting expertise in solving string-related challenges.

PROJECTS

Booking Platform : [Link](#) 2025

- Built an end-to-end room listing and booking platform with user authentication and session handling. Used Express.js and MongoDB for backend APIs and data storage, with EJS for server-side page rendering.

Recipe Preparation Agent : [Link](#) 2025

- Built an AI assistant in IBM Watsonx.ai that suggests recipes based on the ingredients a user has. It provides step-by-step cooking instructions. The project was designed to help reduce food waste and make everyday cooking easier, using Retrieval Augmented Generation (RAG) on IBM Cloud Lite.

E-Plant Shopping Platform : [Link](#) 2024

- built a simple, front-end e-commerce site using React and Vite, showcasing a variety of plants for sale. The site features a responsive design and basic shopping interactions like "add to cart" and "checkout." It runs smoothly in the browser deploying static websites via GitHub Pages.

Myntra Functional Clone [Link](#) 2024

- Built a replica of Myntra (an e-commerce fashion brand) website to showcase my web development skills. Created a front end for the website. The project was built with HTML, CSS and JavaScript.

SKILLS

Languages C, Java, Python, JavaScript

Frameworks & Libraries React, Bootstrap, Node, express, Tailwind CSS

Databases mongodb, MySQL

Web Dev Tools VS Code, GitHub, codesandbox

Soft Skills Problem Solving, Self-Learning, Good listener, Organized, Leadership

Interests Web Development
